

Taking into account the communications received from our raw material supplier, we are able to certify that the substances used in our Evercrete Vetrofluid have been duly and properly pre-registered, and finally registered, or they are still within the legal registration deadlines, or are exempted from registration under the (EU) Regulation No. 1907/2006 relative to the Registration, Evaluation, Authorization and Restriction of Chemicals, substances and chemicals preparation (REACH).

We can also confirm to you that this product does not contain as raw materials of its formulation any on the substances declared SVHC by the ECHA until 16 January 2020, and that therefore, any trace that could be found would come only from the impurities of the raw materials themselves.
